Time: 12:00 PM - 1:00 PM, Refreshments will be served at 11:30AM
Location: CUPA 2nd floor Parson’s Gallery
506 SW Mill Street, Portland, OR

Presented by Lisa Marriott, PhD – Assistant Professor, OHSU/PSU School of Public Health

Dr. Marriott is a science education researcher who engages the public in learning about their health through interactive participation in research. Her work in epigenetics education won a Serious Play Award, was twice published by the National Science Teacher Association, and earned her program the 2015 Technology Award from the Society of Public Health Education.

Epigenetics is a new field of science that explains how the environment and our experiences can change the way our DNA works. Epigenetics can impact both current and future health, thereby bringing a new lens when considering social determinants of health. Learn what epigenetics is, how it is relevant to public health, and how to include it in your health promotion efforts.
